Re: Character Reference for Jim Folsom (case 3:08-cr-01092-JAH)

Dear Honorable John Houston,

My name is Cindy Charlebois. I am 48 years old, married, and mother of two children (18 and 21 years old). I have a Bachelor of Science from Illinois State University in Applied Computer Science and a minor in business and have worked full-time at a major insurance company for over 20 years. My official title is "Information Technology Senior Technical Analyst".

Jim Folsom and I met on the internet and over the phone approximately 5 years ago because the two of us and several others were helping a person who was in trouble, and Jim volunteered his time and organized that effort. We ended up spending quite a bit of time on the phone discussing various interesting subjects and quickly became quite good friends.

I had already done a bit of study on Royal Raymond Rife and his frequency instruments before meeting Jim, and after finding out that Jim sold frequency-type instruments I eventually purchased one. So, my relationship with Jim was first an admiring friend impressed with all he was doing to help another, and next a customer.

I finally got the pleasure of meeting Jim in person at an international RIFE conference in Seattle Washington in October of 2006. That conference had several hundred people in attendance and is hosted almost annually there – see <http://www.rifeconference.com/videos.html>. A great number of health practitioners, many who use RIFE devices in their practice or personally, attended.

Jim has a stellar personality. At all times I have found him to be reliable, honest, peace-loving, concerned about his fellow man, patient, courteous, and kind. I have never heard him swear. He is a gentleman of the highest order. I first was impressed with how much he was doing to help another. He organized conference calls, headed the discussions when necessary, and paid quite a bit of money out of his own pocket to help this man who was in trouble.

Jim is quiet, unassuming, and hesitant to ask anyone else for help but will jump right in when he sees a wrong and will attempt to make it right. For example, I had an internet friend "Tim" in New York who had a very painful and prolonged health concern. Jim ended up becoming acquaintances with Tim because of similar interests, found out about that health issue, knew Tim was strapped for money, and went ahead and mailed him out one of his instruments anyway!

In my personal business transactions with Jim, every time I purchased an instrument he mailed it out before he even received my money! Jim always answered my calls and answered all my questions, no matter how long it took. One time the instrument I received did not work quite as well as it should have, and he mailed a replacement out immediately. He is incredibly patient and always does his best for everyone. He looks for the good in everything and is a great example of just a really "good" person.

Over the years I have purchased several instruments from Jim because they are so effective. I have seen them work to clear physical symptoms that are simply amazing. Here are a few examples:

- 1) My 84-year-old father-in-law had prostate cancer (PSA of 70+, biopsy positive, bone scan positive). He used Jim's frequency device almost every day for about 1.5 hours and took B-17. Just over 2 months later his next PSA had improved to **0.5** and he said he felt great.
- 2) My daughter had what was diagnosed by a dermatologist as "Bullous Impetigo" which started as sores on the back of one leg but became systemic and eventually she had over 50 sores on her body. Normally this would be treated with antibiotics and cortisone cream, but instead she used Jim's frequency device for Strep and Staph, and a terminator zapper. The infection healed up without our filling any of the dermatologist's prescriptions. I took pictures of her legs, and commented on how she treated it, and will include those with this character reference.
- 3) My friend Ray had continuing sinus problems for 15-20 years. About 2 years ago he was getting ready to have a 3rd sinus surgery to clean them out, however, he first tried Jim's frequency device using the "sinusitis" frequency 468 and significantly cleared his sinuses. So much so that he did not need the surgery and is enjoying to this day almost clear nasal passages most of the time. He uses the frequency device regularly, several times a week, to maintain good sinus health.
- 4) Ray's friend Stacy was so allergic to so many things that she was taking many pharmaceutical drugs daily. She tried the frequency device and significantly reduced the number of drugs she was taking to reduce her allergic and breathing symptoms. That was about 1.5 years ago. She's since gotten married, and the last time I passed her at work she said she was down to taking about 1/4th or less of the drugs she used to take because she was using Jim's instrument instead.
- 5) My father was having all kinds of teeth issues. He had many root canals done, and had almost continuing jaw/teeth pain over a long period of time, probably over a year. He'd take a round of antibiotics, the pain would subside, he'd stop the antibiotics, and the pain would come back. He started using the device and it significantly reduced the pain, inflammation, and tenderness surrounding the offending teeth.
- 6) My daughter was attending Illinois State University last year in the spring and got mononucleosis. Mono is a nasty sickness and "WebMD" says "Without other treatment, most people recover from mono after several weeks. But for some, it may take several months before they regain their normal energy levels". Kristy came home from school and stayed with us several days to rest and get better. With the help of Jim's frequency instrument and several other non-drug types of treatments (herbs, etc.) she was able to return to school within a week. She's a double major, Chemistry and Art, and successfully completed the semester with very good grades.

Sincerely,

Cynthia Charlebois
