

June 9, 2009      (***COPY OF LETTER SENT TO JUDGE HOUSTON***)

Honorable John A Houston  
United States District Judge  
940 Front Street  
San Diego, CA 92101

Re: Character Reference for Jim Folsom (case 3/08- cr-01092-JAH)

Dear Honorable Judge Houston,

I am Caroline Flory, age 71, retired, widowed, mother of four children ages 49 to 53. My deceased husband and I received little education beyond high school. which affected our employment options. However, even with out benefit of College degrees, our adult children all function in well paid jobs of their choice. Being low income, often without insurance, we accepted responsibility for our safety, personal health and financial support. My husband was a welder, machinist, a fabricator of great skill. I chose employment to supplement our income as needed. My husband suffered severe burns, trapped between a tree and car, on fire in 1974. Years of recovery and surgeries included ongoing infections for 18 years, even with all available approved medical care..... one draining, open elbow never healed until one brave Doctor offered advice he was not licensed to prescribe, putting his license at risk. Learning the benefits of Colloidal silver opened my eyes to other options for our personal health care that work.

I met Jim Folsom thru our business contact. Severe migraine headaches developed following a car crash, increasing in intensity and frequency. For 16 years, I was under medical care, using approved medicines, which for me meant severe vomiting or total knock-out, interfering with both employment and family life 3 or 4 days a week.

In 1992, a friend , said "You STILL have migraines? I saw a machine that creates electronic frequencies that you should try. Researchers note some frequencies seem to kill headaches." I thought, "What could he know? He's no doctor.... (practicing medicine without a license)....." THANK GOD. I checked out that machine, found a used one for \$2000. hard money.

Nervous, thinking it must be dangerous or illegal, (surely some Doctor would have told me about this option), I carefully read all info provided with it, with no perceived guarantees for success, I made the decision. Dying couldn't be worse than what I was living with.

Alone, blind, puking sick, I selected a preprogrammed auto code listed for

headache research, took the steel probes in sweaty hands and hit "run". What happened next changed my life forever.

Wonderful pulses began moving up my arms. During one individual frequency, in that short session, I became totally relaxed, realizing the pain was gone. STOPPED. Gone. I just sat there, PAIN FREE, not believing what had just occurred. My arms felt empty, with the strong pulses moving thru them. With joy, still in disbelief, I closed my machine, showered, dressed and drove to join my family for dinner, to their absolute shock. THAT WAS MY LAST MIGRAINE. I wish this success for others.

Balancing energy? Killing some pathogen? I don't know or care. Something worked with no side effects except exhilaration and smiles..

Personal benefit has been experienced by me including: Pain relief for bruises, skin separation on blisters and bunions, earache, toothache, rotator cuff and muscle trauma, sore throat and eye infections, shingles, fibromyalgia, itching and pain of insect bites and stings.

Symptoms of infection, colds, flu and allergies have dissappeared quickly. Perhaps some frequency kills the life form causing the illness...

Twice, biopsies were done for fibroid cysts on my breasts. Now, using my machine, I use frequencies with excellent results for swollen breasts or lumps: also swollen lymph glands. Perhaps the vibrations help with circulation of lymph and blood systems. Something works.

Seeing my benefit, others have asked to use my machine for themselves with some interesting reports coming back to me. Such as:

A woman, aged 80+, diagnosed with deterioration of the spine, in constant pain after the second morphine pump had failed and was removed, chose frequencies other researchers report to be helpful for muscle spasms, then slept pain free for 7 hours. Sharing my machine for weeks, they opted to have one in their home where they continue to enjoy it's benefit.

As people used my machine, apparently happy with the benefits from it, they asked me to help them find a source to purchase one. At this point, I was directed to Jim Folsom for equipment. A delightful, straight forward and efficient businessman, the connection has proven to be of great benefit for the many "happy researchers" now using frequencies of their choice in their homes. Of the 20 or 30 machines I know of personally, only one required replacement. Customer Service and deliveries were always quick. Several machines were delivered even before the checks were cleared.

One American residing in Germany, here on vacation, interested in "the story", was scheduled for eye surgery upon his return. He asked for use of the machine, selected some frequencies for his concerns. Returning home, his eye doctor cancelled the surgery. due to changes in eye condition, then promptly contacted me to help him find a similar machine. He purchased one from Africa to continue his own research.

In my circle of friends, most common benefit being reported to me is related to relieving pain and symptoms of fibromyalgia, shingles, allergies, clearing infection for dental work, stimulating muscle condition for one paralyzed young man who died at OHSU following 5 months of in-hospital infection the doctors could not stop.

My older sister Ida, a retired nurse in Illinois, controls the pain of arthritis of the spine with frequencies.

Two doctors and one chiropractor borrowed my machine, treating themselves and family members for infections and migraines. Thirteen physical therapists gathered with me to experience frequencies, expressing great interest. They reported their jobs were "at risk" if they incorporated this technology in practice. Too bad, as Muscle trauma and pain is relieved so quickly.

Considering the cost and problems of healthcare, I pray you will consider all this and return Jim Folsom to his business, life, family and friends. The equipment he has provided for all of us is so efficient, user friendly and affordable. The simplicity of it's design, by comparison to other similar machines, a real plus. I'm so sorry I live so far from court as distance prevents me from speaking on his behalf.

Please overlook any errors here-in. I am only one year into computer.. what a challenge.

Thank you for letting me speak for Justice,  
Sincerely, Caroline R. Flory
